SHURE[®]
LEGENDARY
PERFORMANCE[™]

GLX-D Advanced Digital Wireless extends notable GLX-D features to a whole new audience, including exceptional digital audio, automatic frequency management and intelligent rechargeable batteries. Multi-system installations in House of Worship, schools and music venues can seamlessly and confidently operate up to 9 simultaneous systems in typical conditions (11 channels in optimal conditions). Combined with the fearless reliability, night-after-night durability, and great sound that professionals around the world demand from Shure, GLX-D Advanced is nothing short of a revolution.

GLX-D Advanced products and accessories unlock and expand key GLX-D frequency management features.

1. One GLX-D Advanced Frequency Manager links up to six GLXD4R Rack Mount Receivers via the RF ports, and scans the RF environment.
2. The shared frequency scan of 2.4 GHz band regularly locates the best frequencies for all linked receivers.
3. The Frequency Manager automatically assigns optimal frequencies to all six receivers utilizing patented RF-cable data communication.
4. Linking two Frequency Managers together enables confident operation of up to 9 simultaneous systems in typical conditions (11 channels in optimal conditions).
