

**GRAHAM BLYTH FRSA**

To mark Soundcraft's 30th anniversary, co-founder and Technical Director, Graham Blyth, took a well established and classic Soundcraft microphone preamplifier to a new level of performance, resulting in the new GB30 preamp which boasts extraordinary clarity with exceptionally controlled overload characteristics.

MULTI PURPOSE MIXERS

FX16ii

lexicon®  
24-BIT DIGITAL EFFECTS PROCESSOR

## FX16ii

THE PROFESSIONAL'S CHOICE FOR  
MORE THAN 10 YEARS, NOW THE FX16  
GETS STUNNING 24-BIT LEXICON EFFECTS.

Great sound quality, professional build quality, flexible 4-bus architecture and a space-saving sixteen mic inputs and direct outputs in a rack-mounting frame made the original Soundcraft FX16 popular in both live and recording applications. Now the pro's choice gets even better with a new 24-bit Lexicon on-board effects section and universal internal power supply (see right).

A comprehensive feature set includes 16 mic/line inputs and 26 inputs to mix in total (including stereo returns and tape return to mix). In addition to the mix outputs, 2 buses allow groups of instruments to be sent to additional speakers, or sub-grouped to mix. 16 Direct Outputs are individually switchable pre or

post fader, making them equally useful for multitrack recording or live use. Both Solo In Place and PFL solo are available, for studio monitoring and channel gain set-up applications respectively.

All 16 mic/line inputs are equipped with high quality UltraMic™ preamps while a 'truly British' 3-band EQ with swept mid benefits from custom designed pots which give greater control across carefully chosen frequencies. There are 4 Auxiliary Sends, including a dedicated effects send, 1 pre-fade send and 2 pre/post-fader selectable sends which are equally useful as extra foldback sends or as effects sends in studio mixdown situations. In addition, there are 4 Stereo returns, a separate Mono Sum Output and 2 Subgroup Outputs.

A truly professional feature set is completed by 100mm faders for precision mixing control, and the FX16ii fits all of these features into a rugged, compact frame which can be optionally rack-mounted into a 10U space. Cables can be conveniently located behind the rack by simply rotating the connector pod.

A - Connector pod positioned for desktop use.  
B - Connector pod rotated for rack-mounting.

KEY FEATURES	
• 26 inputs as standard	
• 16 mono channels with UltraMic™ preamps	
• 4 stereo returns	
• 4-bus architecture with sub-group routable to mix	
• 24-bit Lexicon effects processor	
• Direct outputs for multitrack recording individually switchable for pre/post fade operation	
• 100mm faders	
• Inserts on all mono channels	
• Inserts on stereo mix bus	
• 3-band 'British' EQ with swept mid-band	
• 100Hz high-pass filter	
• +48V phantom power	
• 10 segment tri-coloured metering	
• 2 sub-group outputs	
• Rack mountable with rotating rear panel	
• Universal internal power supply	

ON-BOARD EFFECTS FROM  
THE WORLD-LEADERS IN  
DIGITAL SIGNAL PROCESSING.

Empowers the  
FX16ii, MFXi &  
EFX consoles.

For more than 35 years, Lexicon has been synonymous with the best reverb and processing in the business, continuously introducing ground-breaking technology to the audio industry. Today, Lexicon processing is heard on over 80% of all recordings - broadcast and film soundtracks. Now Soundcraft empowers three ranges of multi-purpose mixers - FX16ii, EFX, and MFX - with stunning 24-bit digital effects processing using the same AudioDNA® processor used in the highly-acclaimed Lexicon MX300 processor.

A total of 32 preset effects including reverbs, delays and choruses are available along with 3 effects parameter controls and a tap tempo button.

The versatility of the effects section is further enhanced by the facility to store user-defined effects settings allowing the user to return to their favourite settings time after time.

Effects can be switched on and off using a footswitch.

Effects section from EFX mixer shown above. Features and functionality of FX16ii, EFX and MFXi mixers are the same, but layouts differ slightly.

EPM

EFX

# EPM/EFX

SOUNDCRAFT SOUND QUALITY, PERFORMANCE AND VALUE FOR MONEY IN A VERSATILE RANGE OF MULTI PURPOSE MIXERS – AVAILABLE WITH AND WITHOUT EFFECTS.

EFX/EPM mixers bring Soundcraft sound quality, performance and value-for-money to a wide range of applications including recording, live sound, install and broadcast. Available in 8 and 12 mono input channel configurations, the EFX mixers feature built-in Lexicon 24-bit processing, providing access to 32 world class reverb, delay and chorus effects (see previous page). For users preferring to use external processing, three EPM mixers – (6, 8 and 12 mono inputs – replace the EFX's internal FX send with a second Aux send. All EFX/EPM mixers feature 2 stereo channels as standard.

Configured for desktop use with all audio connectors conveniently located on the top panel, EFX/EPM mixers can be easily converted for rack-mounting using an optional rack kit, with each mixer occupying just 8U of standard rack space. EFX/EPM mixers feature professional +48V phantom power for condenser microphones and use the same GB30 microphone preamps used on Soundcraft's acclaimed, large format GB Series consoles to achieve exceptional clarity, low-noise and controlled overload characteristics.

Drawing on more than 30 years of experience manufacturing professional mixing consoles, Soundcraft has equipped the EFX/EPMs with all the appropriate features for modern mixing applications, at the same time creating an uncluttered and intuitive control surface that enhances the operator experience. Visual feedback is further enhanced by peak LEDs on all input channels which are fed from multiple points in the signal path to ensure that nothing is overlooked. The LEDs illuminate in proportion to the signal level when approaching peaks, enabling the

quality of the signal to be maximised through using all the available headroom. Furthermore, the main stereo mix has 10-segment LED meters with a PFL Active LED to indicate that channels are being solo'd.

Rack ears are included with 12 channel consoles.

KEY FEATURES	EPM	EFX
• Built-in Lexicon 24-bit effects		✓
• Multi-point signal channel status monitoring with proportional illumination	✓	✓

MFX

MPM

MFX

MORE CHANNELS, MORE AUXES AND 2 GROUP BUSSES.  
WHEN YOU NEED EVEN GREATER FLEXIBILITY,  
YOU NEED MFXi/MPMi.

MPM

## MPMi/MFXi

Soundcraft's MFXi/MPMi mixers are compact and ideally equipped for live sound applications including fixed installations, houses of worship and portable PA.

8, 12 and 20 mono input MFXi mixers are empowered by built-in 24-bit Lexicon processing, delivering 32 stunning reverb, delay and chorus effects (see opening page). The MPMi versions replace the MFXi's internal FX send with a third Aux send for operators preferring to use external effects. All MFXi/MPMi mixers include 2 stereo input channels along with a 2-track record output and a 2-track replay input which allows interval music to be easily played from CD, MP3 or other music source.

For increased versatility, each model in the MFXi/MPMi range has two subgroups as well as a main stereo mix, making control of groups of channels much easier to manage. These are supplemented by 2 (MFXi) or 3 (MPMi) Auxiliary busses which can be used for effects sends or to provide a foldback monitor mix for artists.

The MFXi/MPMi consoles use vertically mounted PCBs which are secured with nitted pots for extra strength, stability and easy servicing. Well-spaced controls provide easy access at those critical control moments, enhanced by clear legending which highlights linked or associated functions.

Sound quality is assured by Soundcraft's now-legendary GB30 mic preamp and the use of professional condenser microphones is facilitated by the provision of globally switched +48V phantom power. New circuit designs have improved audio quality, and lowered the overall noise floor of the console and FX sections. An integral universal power supply negates the need for an external power module.

Rack ears are included with 12 channel consoles.

KEY FEATURES	MPMi	MFXi
• Built-in Lexicon 24-bit effects		✓
• Precision GB30 mic pre-amps	✓	✓
• True, professional +48V phantom power for condenser microphones	✓	✓
• 2 Group busses	✓	✓
• Stereo Mix output	✓	✓
• Number of Mic inputs, all with 2 stereo line inputs	12/20	8/12/20
• Maximum inputs to mix	18/26	16/20/28
• Aux sends, globally switchable pre or post-fade	1 + 1 pre fade and 1 post fade	1 + 1 pre fade
• FX send	None	1
• Universal internal power supply	✓	✓
• Optional rack ears (standard on 12 channel)	✓	✓

The addition of a Kensington lock slot on MFXi/MPMi consoles provides a welcome level of security in installations.

# MONO INPUT, STEREO INPUT & MASTER SECTION

FX16ii

# BLOCK DIAGRAMS

FX16ii

FX16ii  
Mono Input Channel

FX16ii  
Master Section

## MONO INPUT MODULE

### Mic Input

A female XLR connector accepts balanced or unbalanced mic signals. At -127dbu EIN the mic amp is extremely quiet and transparent with excellent overload characteristics.

### Line Input

A balanced 1/4" jack for connecting balanced or unbalanced electronic instruments, such as keyboards.

### Insert

A pre-EQ insert is available on a 1/4" jack.

### Direct Output

A Direct Output for multitrack recording is available on a 1/4" jack can be switched pre/post fader.

### Sensitivity

A rotary control on each input alters the sensitivity of the input signal, from -60dBu to 0dB.

### High Pass Filter

A switchable stereo 18dB/octave 100Hz high-pass filter can be used to cut stage rumble.

### EQ Section

Equalisation is split into three bands with shelving HF and LF controls providing 15dB of cut or boost (gain adjustment) at 12kHz and 80Hz. A swept mid frequency control enables frequencies from 150Hz to 3.5kHz to be adjusted with up to 15dB of cut or boost at the selected frequency, with a Q of 1.5.

### Auxiliary Section

For sending separate monitor mixes in live applications, or for use with fx units three aux sends on each input channel cater for all requirements. Aux1 is permanently sourced pre-fade, Aux 2 is individually switchable pre/post fade and Aux 3 is permanently sourced post fade.

### FX Send

For sending signal to the internal 24-bit Lexicon effects.

### Pan, Muting, Sub, Mix and Solo

The Pan control positions each channel's signal across the stereo image, with a Mute button to cut the signal completely. The Sub/Mix buttons sends the signal to a separate group (for multitrack recording or to an additional set of speakers) or to a subgroup to mix. Both Solo In Place and PFL solo are available, for studio monitoring and channel gain set-up applications respectively.

### Faders and Metering

Each mono channel features a smooth 100mm fader, and a peak level LED indicating signal levels within 6dB of clipping.

## MASTER SECTION

### Effects

A rotary control selects the effect program, with three rotary controls for effect parameters and one to control the effects level sent to Aux 1. Buttons for PFL, Mute, Store (user effect set-up) and Tap Tempo (for time/speed-based effects such as delays). Footswitch input for FX on/off.

### +48V Phantom Power

Dual global control over professional +48V phantom power is offered via push buttons (split channels 1-8 and 9-16). LEDs illuminate when active.

### 2-Track Inputs

2-track recorder inputs are on unbalanced RCA phono connectors. A 2-track level control is also provided.

### Monitor Output and Mix Insert

Available on balanced 1/4" jacks.

### Sub Group Output and Insert

Available on balanced 1/4" jacks.

### Mix Outputs

The main left and right mix outputs are provided on balanced XLR connectors.

### Monitor & Phones Level

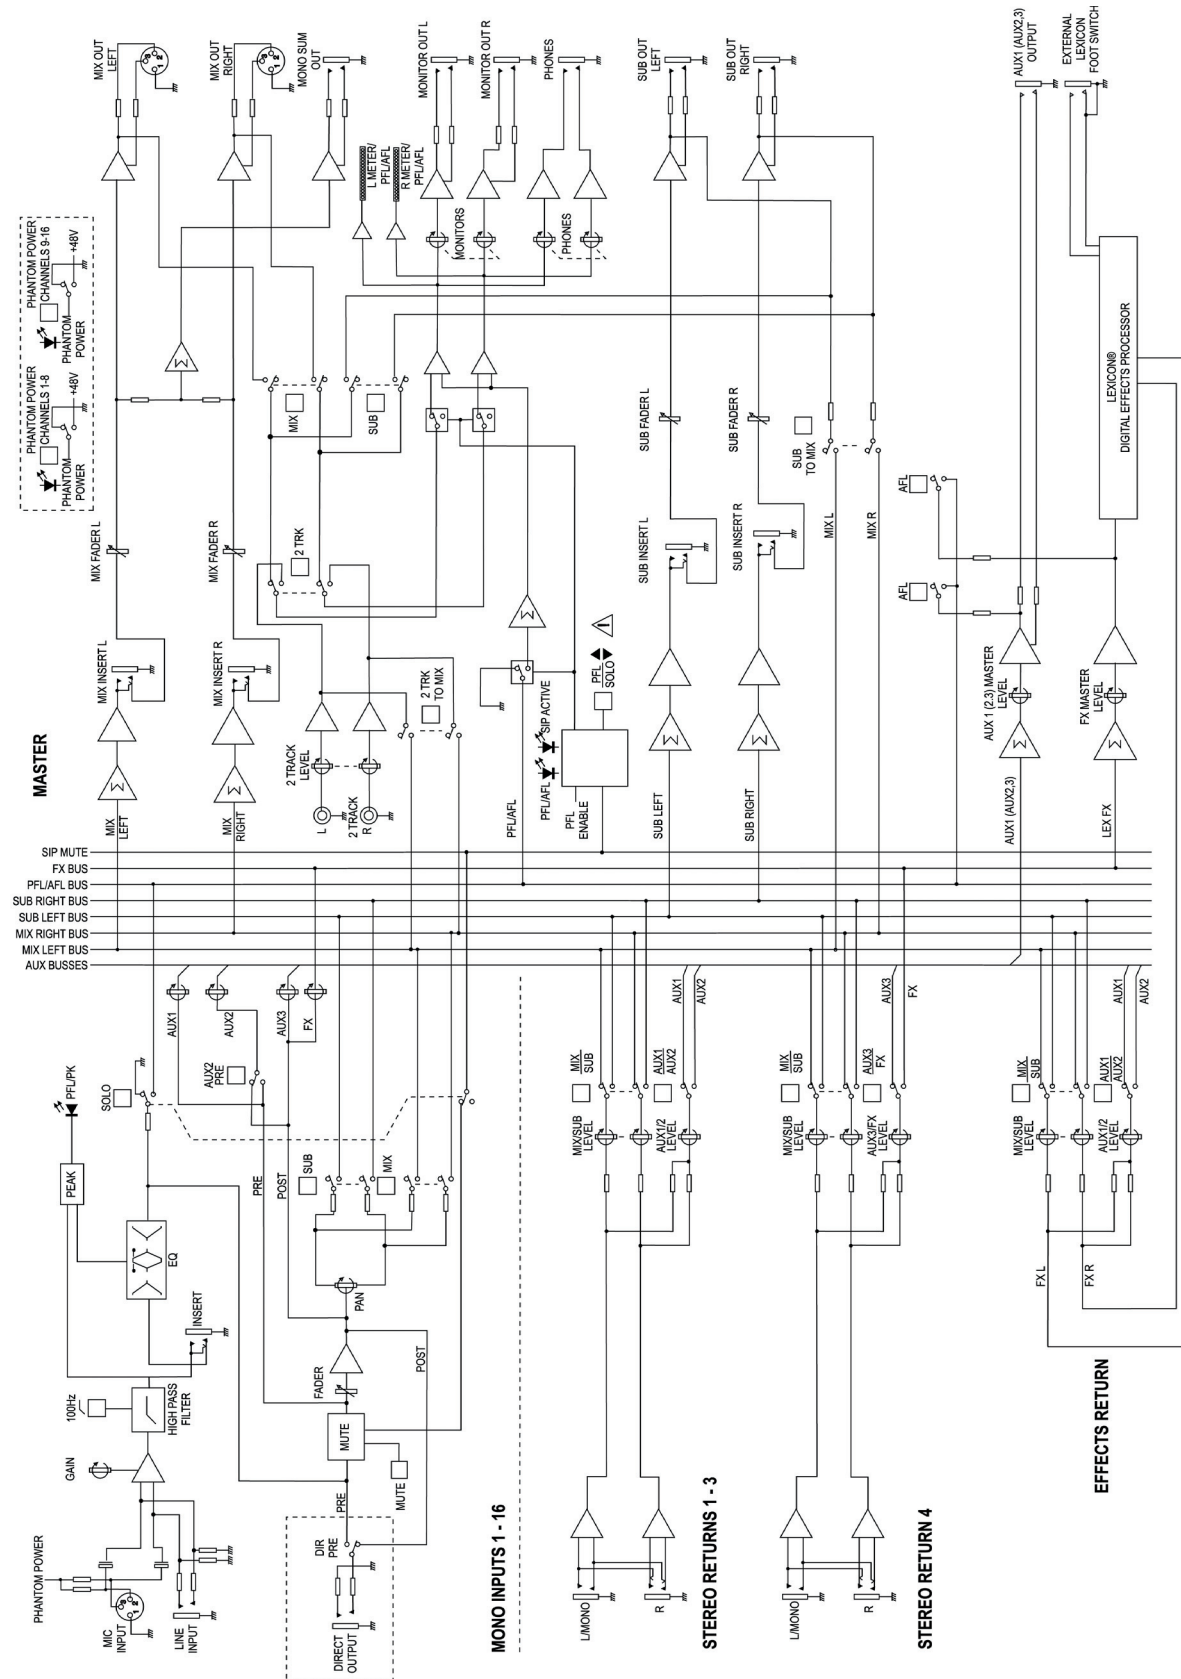

Levels sent to the monitor output and headphones can be independently adjusted using these two rotary controls. And when a pair of headphones are plugged into the phones socket at the bottom right of the mixer, the monitor outputs are still operational for simultaneous listening by a performer and engineer.

### Faders and Metering

Controlling the sub group outputs and overall stereo mix level are two pairs of 100mm faders, with a Sub to Mix switch provided. Two 10-segment 3-colour LED peak-reading bargraph meters display the L-R output levels, which are replaced by an active Solo signal. A Solo Mode switch selects PFL/AFL Solo or SIP Solo, with indicated by LEDs. 2-track, Mix and Sub selector switches are also provided.

### Aux Outputs and Stereo Returns

3 aux outputs are available on 1/4" jack, each with rotary level controls and AFL switch. In addition, a rotary level control and AFL switch is provided for FX. 4 pairs of stereo returns are provided on 1/4" jacks. Returns 1-3 have their own level control switchable to Aux 1 or 2 with a separate level control switchable to Mix or Sub. Return 4 has its own level control switchable to Aux 3 or FX send with a separate level control switchable to Mix or Sub. The FX return has its own level control switchable to Aux 1 or 2 with a separate level control switchable to Mix or Sub.

# MONO INPUT, STEREO INPUT & MASTER SECTION

**EPM EFX**

# BLOCK DIAGRAMS

**EPM EFX**

EFX Mono  
Input Channel

EFX Stereo  
Input Channel

EFX Master  
Section

## EFX - EPM: THE DIFFERENCES

EFX input channels feature an FX send to the internal Lexicon effects processor, along with a single Aux send for use with external processors, or to create a monitor mix.

With no internal Lexicon effects, EPM input channels replace the FX send with a second Aux send.

The EFX stereo input channels feature 3-band EQ. The EPM stereo input channels features 2-band EQ.

## MONO INPUT MODULE

### Mic Input

A gold-plated balanced female XLR connector accepts balanced or unbalanced mic signals. At -127dBu EIN the mic amp is extremely quiet and transparent with excellent overload characteristics.

### Line Input

A balanced 1/4" jack for connecting balanced or unbalanced electronic instruments, such as keyboards.

### Insert

Used for patching in compressors or additional EQ or for other signal processors. It can also be used for recording to multi-track recorders if necessary.

### Gain

A rotary gain control on each input alters the gain of the input signal, from +5 to +60dB (Line Inputs have -15dB attenuation). Linear circuitry within the preamp delivers smooth gain control over the entire gain range.

### EQ Section

Equalisation is split into three bands. The shelving HF control provides 15dB of cut or boost (gain adjustment) for frequencies above 12kHz. A swept mid frequency control enables frequencies from 150Hz to 3.5kHz to be adjusted with up to 15dB of cut or boost at the selected frequency. Signals below 80Hz can be adjusted with the LF control, which features  $\pm 15$ dB of gain adjustment (cut or boost).

### Auxiliary Section

One (EFX) or two (EPM) Aux for sending separate monitor mixes in live applications, or for use with external effects. The Aux bus(es) can be globally switched to be pre or post fade on the master section.

### FX Send (EFX only)

For sending signal to the internal 24-bit Lexicon effects.

### Pan, Muting, and PFL

The Pan control positions each channel's signal across the stereo image, with a Mute button to cut the signal completely. A PFL button solos the signal for monitoring.

### Faders and Metering

Each mono channel features a smooth 60mm fader, and a peak level LED indicating signal levels in excess of +17dBu.

## STEREO INPUT CHANNEL

### Input Connectors

The stereo inputs are connected via balanced 1/4" jack inputs, delivering optimum performance with other professional audio equipment.

### EQ Section

The EFX features three fixed shelving controls, adjusting HF signals at 8kHz by  $\pm 15$ dB, MF signals at 720Hz by  $\pm 15$ dB and LF signals at 60Hz by  $\pm 15$ dB. The EPM features two fixed shelving controls, adjusting HF signals at 12kHz by  $\pm 15$ dBu and LF signals at 80Hz by  $\pm 15$ dB.

### Auxiliary Section

The signal(s) can be sent pre-fade or post-fade according to master selection, for use in a monitor mix or for effects processing.

### FX Send (EFX only)

For sending signal to the internal 24-bit Lexicon effects.

### Bal, Muting, and PFL

The Balance control adjusts the amount of the signal sent to the left and right busses. Mute and PFL buttons operate as on the mono input channels, cutting or soloing the stereo channel. With PFL pressed, the prefade signal is fed to the headphones, control room output and meters.

### Faders and Metering

Each stereo channel features a smooth 60mm fader, and a peak level LED indicating signal levels in excess of +17dBu.

## MASTER SECTION

### Effects (EFX only)

A rotary control selects the effect program, with three rotary controls for effect parameters and one to control the effects level sent to Aux 1. Buttons for PFL, Mute, Store (user effect set-up) and Tap Tempo (for time/speed-based effects such as delays). Footswitch input for FX on/off.

### +48V Phantom Power

Global control over professional +48V phantom power is offered via a push button. When active, an LED will illuminate.

### 2-Track Inputs and Outputs

2-track recorder playback inputs and record sends are on unbalanced RCA phono connectors. Monitor Playback routes the playback input to your monitoring system or to the headphones, replacing any existing monitoring signals. Playback to Mix routes the playback signal directly to the main mix, replacing any signal that may be present, perfect for intermission music or as a master mute.

### Monitor Output and Mix Insert

Available on balanced 1/4" jacks.

### Stereo Return (EFX only)

Available on 1/4" jacks with level control for use with external processors.

### Mix Outputs

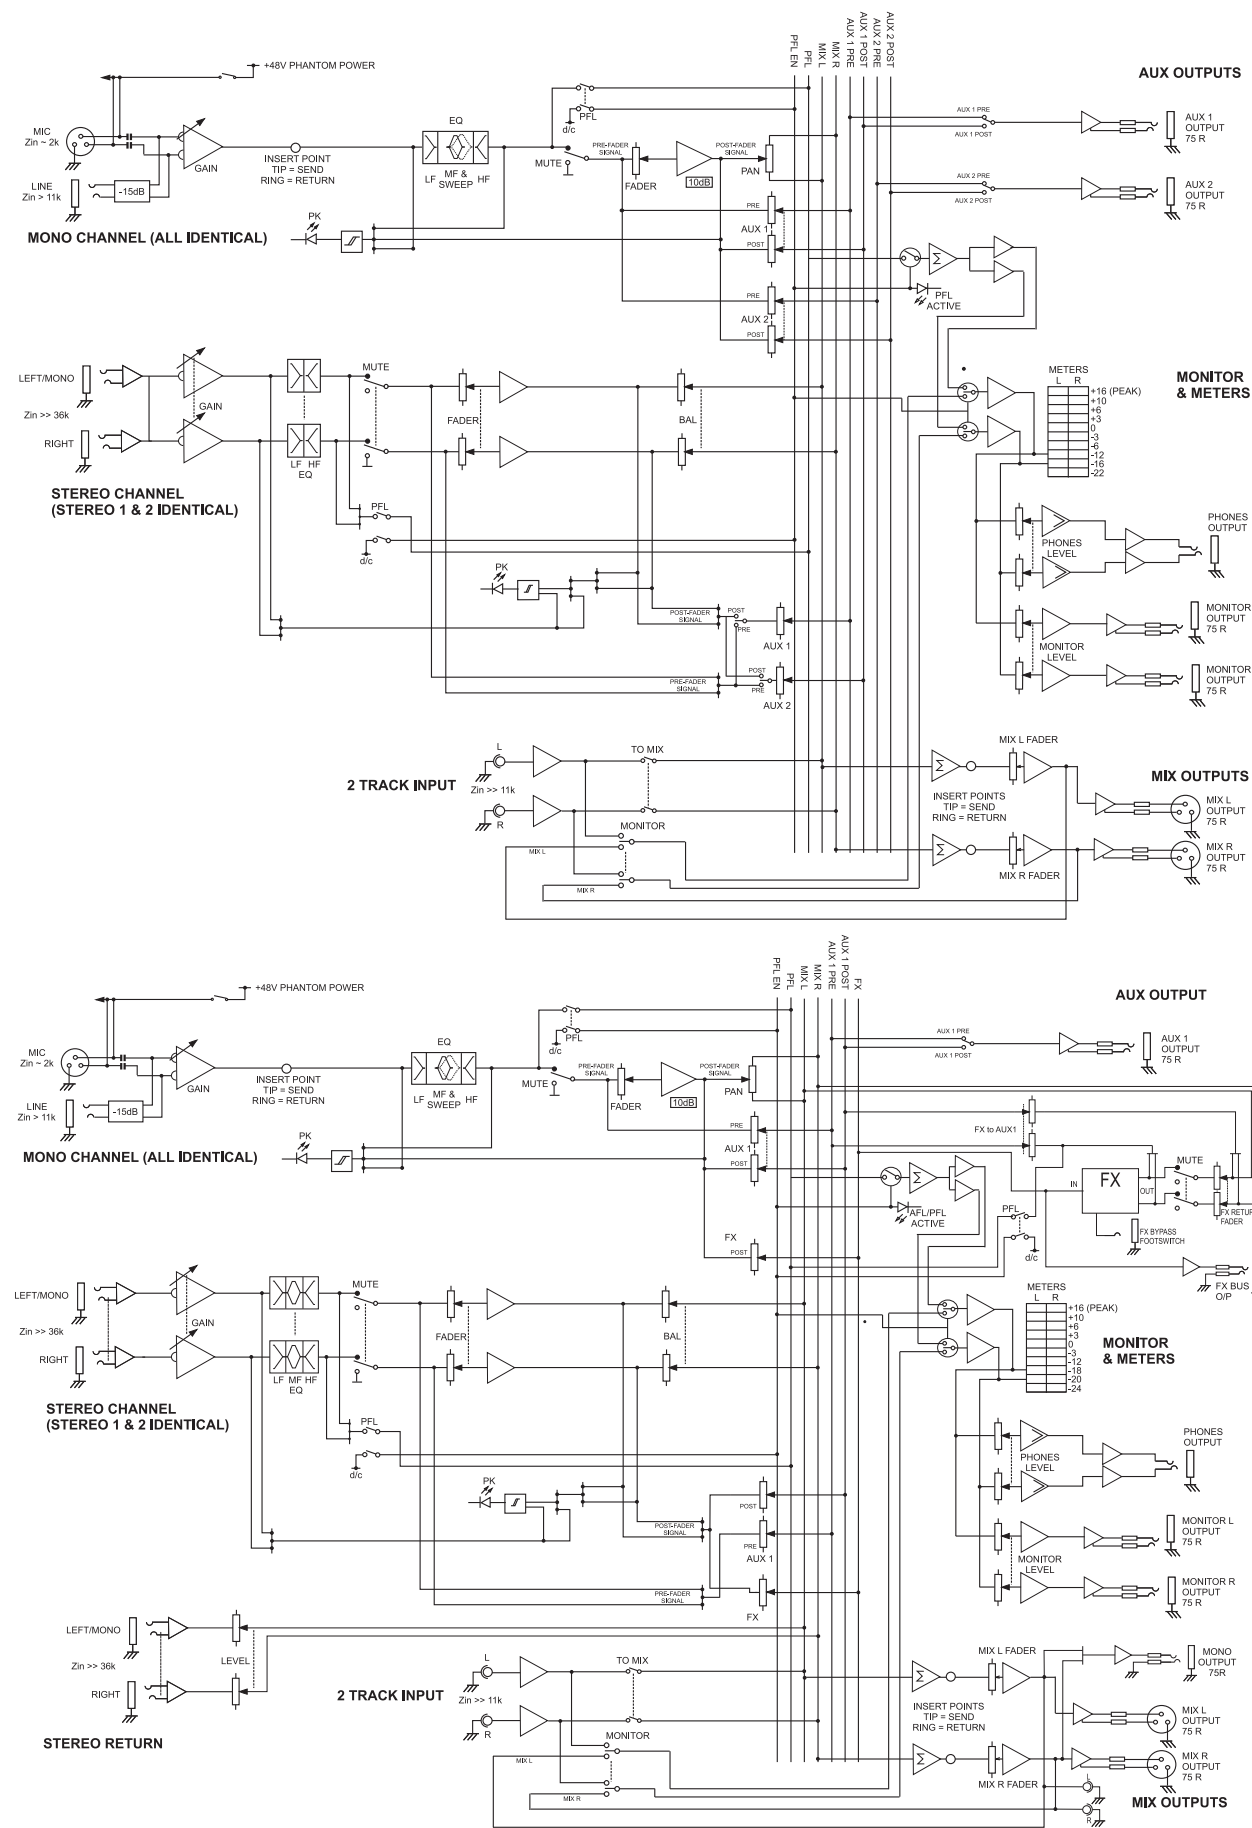

The main left and right mix outputs are provided on balanced XLR connectors.

### Monitor & Phones Level

Levels sent to the monitor output and headphones can be independently adjusted using these two rotary controls. And when a pair of headphones is plugged into the phones socket at the bottom right of the mixer, the monitor outputs are still operational for simultaneous listening by a performer and engineer.

### Faders and Metering

Controlling the overall stereo mix level are two 60mm faders, with two 10-segment 3-colour LED peak-reading bargraph meters monitoring the mix left and right outputs. These meters normally follow the current monitor selection, so if any PFL button is pressed, the meters will switch to monitor this and the PFL Active LED will light.

**MPM MFX**

# BLOCK DIAGRAMS

**MPM MFX**

MPM Mono  
Input Channel

MPM Stereo  
Input Channel

MPM Master  
Section

## MPM - MPM: THE DIFFERENCES

MPM input channels feature an FX send to the internal Lexicon effects processor, along with 2 Aux sends for use with external processors, or to create a monitor mix. MPM consoles include an additional stereo return to mix with its own level control.

With no internal Lexicon effects, MPMi input channels replace the FX send with a third Aux send.

## MONO INPUT MODULE

### Mic Input

A gold-plated balanced female XLR connector accepts balanced or unbalanced mic signals. At -127dbu EIN the mic amp is extremely quiet and transparent with excellent overload characteristics.

### Line Input

A balanced 1/4" jack for connecting balanced or unbalanced electronic instruments, such as keyboards.

### Insert

Used for patching in compressors or additional EQ or for other signal processors. It can also be used for recording to multi-track recorders if necessary.

### Gain

A rotary gain control on each input alters the gain of the input signal, from +5 to +60dB (Line Inputs have -15dB attenuation). Linear circuitry within the preamp delivers smooth gain control over the entire gain range.

### EQ Section

Equalisation is split into three bands. The shelving HF control provides 15dB of cut or boost (gain adjustment) for frequencies above 12kHz. A swept mid frequency control enables frequencies from 150Hz to 3.5kHz to be adjusted with up to 15dB of cut or boost at the selected frequency. Signals below 80Hz can be adjusted with the LF control, which features  $\pm 15$ dB of gain adjustment (cut or boost).

### Auxiliary Section

Two (MPMi) or three (MPMi) Aux sends for sending separate monitor mixes in live applications, or for use with external effects. In the Master Section, each Aux bus has its own master level control and AFL. Aux 1 is fixed pre-fade, Aux 2 is switchable pre or post-fade, and Aux 3 (FX on MPMi) is set post-fade.

### FX Send (MPM only)

For sending signal to the internal 24-bit Lexicon effects.

### Pan, Muting, PFL and Routing

The Pan control positions each channel's signal across the stereo image, with an illuminated Mute switch to cut the signal completely. A PFL button solos the signal for monitoring. The mono channels can be routed to either the main Mix outputs or the Sub Groups via the Mix/Grp switch.

### Faders and Metering

Each mono channel features a smooth 60mm fader, along with Signal Present and Peak level indicator LEDs, which are located just above the fader for easy viewing of signal status.

## STEREO INPUT CHANNEL

### Input Connectors

The stereo inputs are connected via balanced 1/4" jack inputs, delivering optimum performance with other professional audio equipment.

### EQ Section

There are three fixed shelving controls, adjusting HF signals at 8kHz by  $\pm 15$ db, MF signals at 720Hz by  $\pm 15$ db and LF signals at 60Hz by  $\pm 15$ dB.

### Auxiliary Section

With 2 (MPMi) or 3 (MPMi) Aux sends on the stereo input channels, the signal can be sent pre-fade (Aux 1), pre or post-fade (Aux 2) or post-fade (Aux 3/FX). Aux 2 is switchable pre or post-fade on the Master section.

### FX Send (MPM only)

For sending signal to the internal 24-bit Lexicon effects.

### Bal, Muting, PFL and Routing

The balance control adjusts the amount of the signal sent to the left and right busses. Mute and PFL buttons operate as on the mono input channels, cutting or soloing the stereo channel. With PFL pressed, the prefade signal is fed to the headphones, control room output and meters. The stereo input channels can be routed to either the main Mix outputs or the Sub Groups via the Mix/Grp switch.

### Faders and Metering

Each stereo channel features a smooth 60mm fader, and a peak level LED indicating signal levels in excess of +17dBu.

## MASTER SECTION

### Effects (MPM only)

A rotary control selects the effect program, with three rotary controls for effect parameters and two to control the effects level sent to Auxes 1 and 2. Buttons for PFL, Mute, Store (user effect set-up) and Tap Tempo (for time/speed-based effects such as delays). Footswitch input for FX on/off. The FX return fader has both Signal present and Peak LEDs for easy viewing of signal status. The FX master has AFL switching to check the level of the signal being sent to the FX section (or external processor).

### +48V Phantom Power

Global control over professional +48V phantom power is offered via a push button. When active, an LED will illuminate.

### 2-Track Inputs and Outputs

2-track recorder playback inputs and record sends are on unbalanced RCA phono connectors. The Playback to Mix control routes the signal directly to the main mix, replacing the signal that is present.

### Monitor Switching

Monitor outputs are selectable from 2-Track input, and Mix or Sub outputs.

### Monitor Outputs

Available on balanced 1/4" jacks, the Headphone and Control Room monitor outputs feature independent level control.

### Mix Outputs

The main left and right mix outputs are provided on balanced XLR connectors.

### Stereo Return (MPM only)

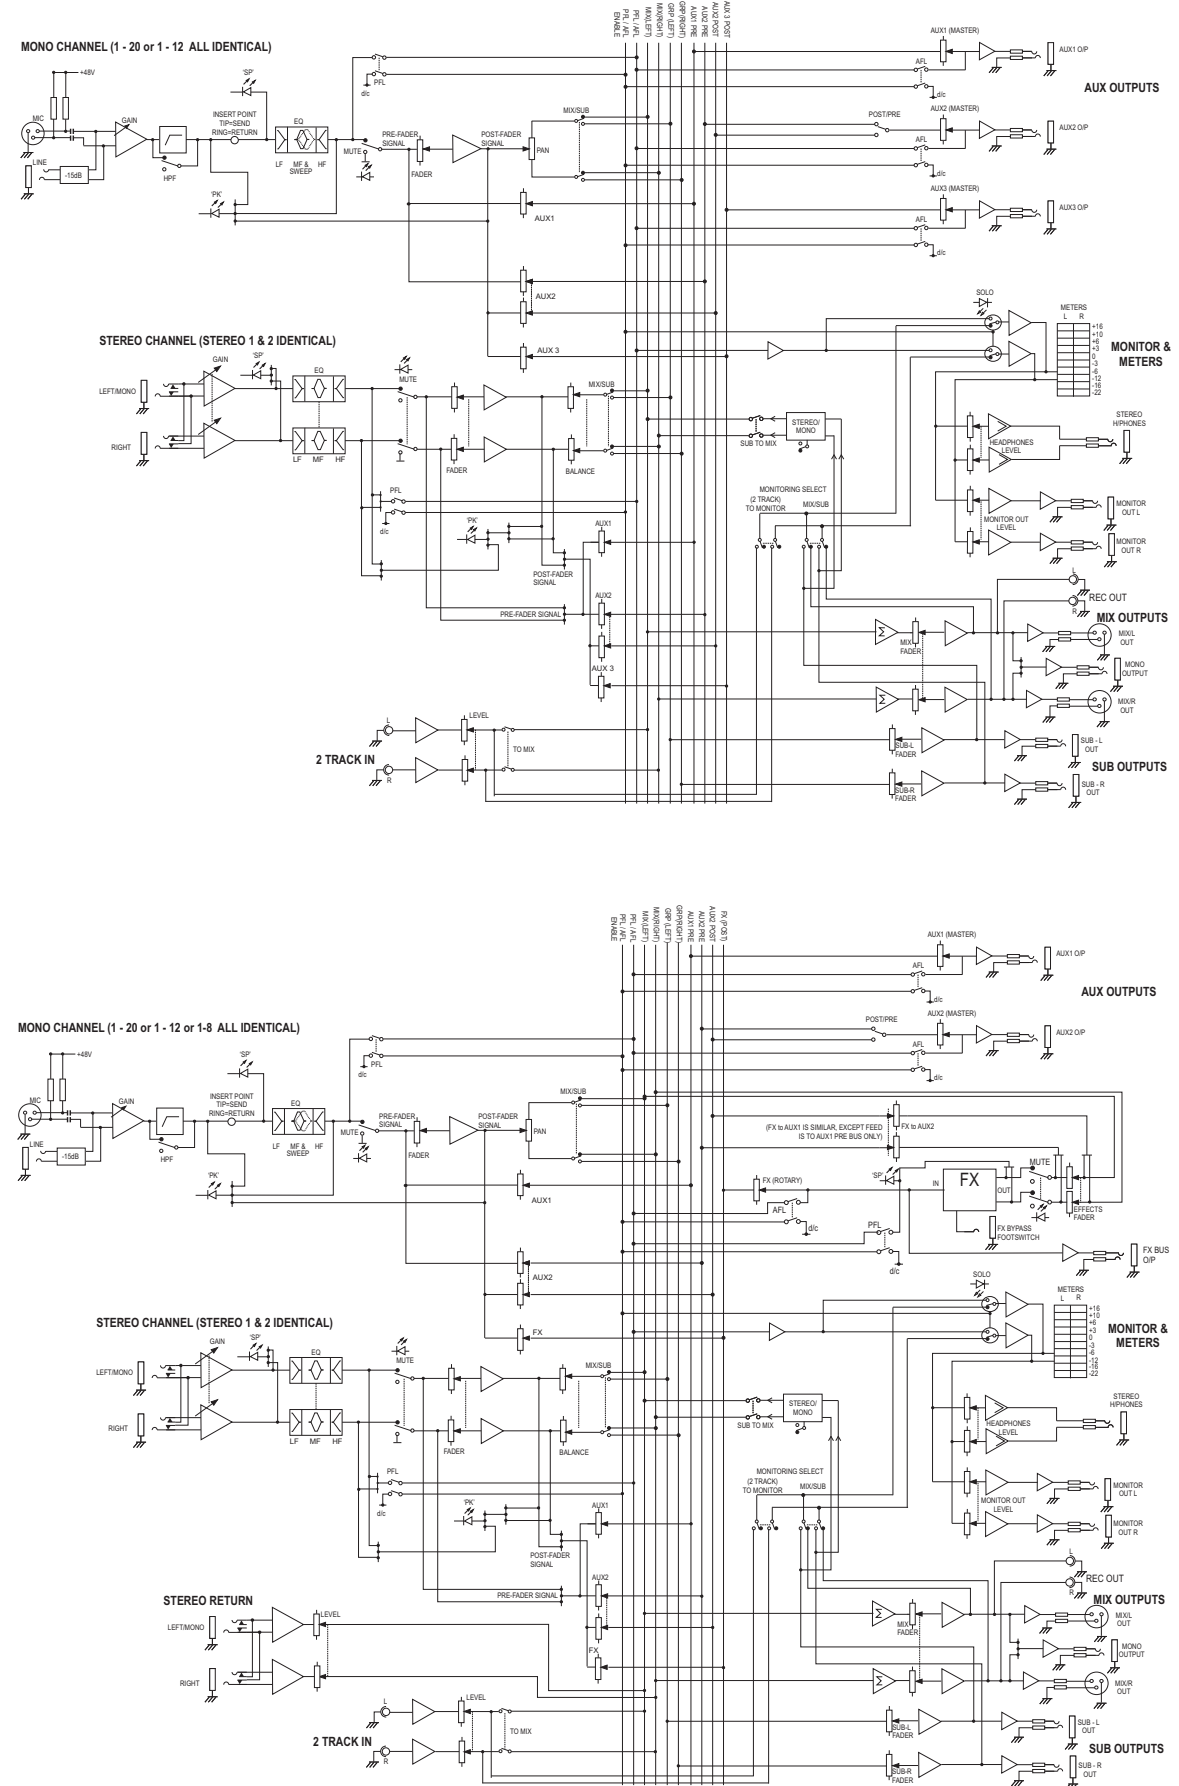

Available on 1/4" jacks with level control for use with external processors.

### Sub Groups

Control over the Sub Groups comes via L-R Sub Group faders. The Sub Group outputs are 1/4" jacks

### Faders and Metering

L-R Group faders control the Sub Group levels while overall stereo mix is handled by a single 60mm fader, with two 10-segment 3-colour LED peak-reading bargraph meters monitoring the mix left and right outputs. These meters normally follow the current monitor selection, so if any PFL Active LED button is pressed, the meters will switch to monitor this and the PFL Active LED will light.

EPM/EFX TYPICAL SPECIFICATIONS

Frequency Response	Mic/Line Input to any Output .....	+/-1.5dB, 20Hz – 20kHz
T.H.D.	Mic Sensitivity -30dBu, +14dBu @ Mix output.....	< 0.02% @ 1kHz
Noise	Mic Input E.I.N. (maximum gain) .....	-127dBu (150Ω source)
	Aux, Mix and Masters (@ 0dB, faders down).....	< -85dBu
Crosstalk (@ 1kHz)	Channel Mute.....	> 96dB
	Fader Cut-off (rel +10 mark).....	> 96dB
	Aux Send Pots Offness.....	> 86dB
EQ (Mono inputs)	HF .....	12kHz, +/-15dB
	MF (swept).....	150Hz – 3.5kHz, +/-15dB
	LF .....	80Hz, +/-15dB
	Q .....	1.5
EQ (Stereo inputs)	HF .....	12kHz, +/-15dB
	MF (EFX Only) .....	720Hz, +/-15dB
	LF .....	80Hz, +/-15dB
Power Consumption	.....	Less than 35W
Operating Conditions	Temperature Range .....	5°C to +40°C
Input & Output Levels	Mic Input .....	+15dBu max.
	Line Input.....	+30dBu max.
	Stereo Input.....	+30dBu max.
	Mix Output .....	+20dBu max.
	Headphones (@150Ω) .....	300mW
Input & Output Impedances	Mic Input .....	2kΩ
	Line Input .....	10kΩ
	Stereo Input .....	65kΩ (stereo), 35Ω (mono)
	Outputs .....	150kΩ (balanced), 75Ω (unbalanced)

MPMi/MFXi TYPICAL SPECIFICATIONS

Frequency Response	Mic/Line Input to any Output .....	+/-1.5dB, 20Hz – 20kHz
T.H.D.	Mic Sensitivity -30dBu, +14dBu @ Mix output.....	< 0.01% @ 1kHz
Noise	Mic Input E.I.N. (maximum gain) .....	-126.5dBu (150Ω source)
	Aux, Mix and Masters (@ 0dB, faders down).....	< -85dBu
Crosstalk (@ 1kHz)	Channel Mute.....	> 96dB
	Fader Cut-off (rel +10 mark).....	> 96dB
	Aux Send Pots Offness.....	> 86dB
EQ (Mono inputs)	HF .....	12kHz, +/-15dB
	MF (swept).....	150Hz – 3.5kHz, +/-15dB
	LF .....	80Hz, +/-15dB
	Q .....	1.5
EQ (Stereo inputs)	HF .....	12kHz, +/-15dB
	MF .....	720Hz, +/-15dB
	LF .....	80Hz, +/-15dB
Power Consumption	.....	Less than 40W
Operating Conditions	Temperature Range .....	5°C to +40°C
Input & Output Levels	Mic Input .....	+15dBu max.
	Line Input.....	+30dBu max.
	Stereo Input.....	+30dBu max.
	Mix Output .....	+20dBu max.
	Headphones (@150Ω) .....	300mW
	Recommended headphones impedance .....	32 - 200Ω
Input & Output Impedances	Mic Input .....	2kΩ
	Line Input .....	10kΩ
	Stereo Input .....	45kΩ
	Outputs .....	150kΩ (balanced), 75Ω (unbalanced)

Note: These figures are typical of performance in a normal electromagnetic environment and are often exceeded. Performance may be degraded in severe conditions. All measurements refer to electronically balanced inputs and outputs.
